I tried the demo, played a few videos, and was quite impressed with it.

I had a few other Media-Players installed on my computer, but right away I could notice better crispness, clarity and an overall greater quality of the video and audio that I see and hear with Zoom Player. I like the simplicity and intuitive feel of the controls, yet there are still a lot of options available that I can experiment with and set things to how I like. This will now be my default Media Player, and I'm glad to have bought the full version to help support the Developers of this high-quality software.

For a full list of features and comparisons of the different versions of Zoom Player, visit the following page:

http://winmatrix.com/vzplayer/pro/versions_home8.shtml

PS: As for the argument I see from some, "Why buy Zoom Player when there's plenty of free media-players available?".... Well, call me strange, but I like to help support the Developers of programs I enjoy and use.

Yes, there's free media-players out there, but they also tend to have a "Donate" option some place on their website or an option to upgrade to a Pro version. Plus, there's also a free-version of Zoom-Player that can be downloaded as well.. While miles better than their first Sherlock Holmes game, this second outing is still not good. The plot's a bit of a jumble, and the items you have to find far too hidden. There's also no first person option, so most of the game is spent watching Holmes walk slowly around the large areas.

Frogwares gets better though! In fact every game after this is well worth playing, even the silly Hound of the Baskervilles.. 4/10 Graphics and sound are a bit pants. THis game is not well optimised and did not run well on my 2080 ti.

There are a few scares here, but there is no real game to speak of. You wonder aimlessly in a forest with a lamp until something gets you. I don't recommend this. There are a lot better games out there.. GET THIS AWESOME GAME. Easily one of the best workouts you can have in VR. I really like this game... It's got great presentation and is a simple enough concept that anyone can give it a go... highly recommended!. Summary: Average Casual (Diner Dash like) wedding game

It's a pretty casual game, the MC is ditzy and all over the place but it was pretty fun. Time flies as you play it for sure and the minigames are varied so thats pretty nice! I think you should totally get it when its on discount. I bought it for ~\$9.50 and i think thats a pretty alright price.

The story is "Eh" I think there are supposed to be like 'lessons learned' in each chapter of the game but they seemed kind of awkward AHA~

. Play this game if you wanna roam around in a point and click adventure with nice visuals and good techno music, knowing very little on what you're supposed to do except you're a twisted girl with memory loss and overwhelming inner violence, in a dark and cynical cyberpunk universe. Do I recommend it ? Hell yeah !

Disregard this review. I have updated it.

Actually due to my stupidity I found the issue. In the LocalLow folder the game folder had 2 version in it and they must of been cross talking. I deleted both and started game. Played well for 2hrs. I am changing my review just because I am a moron and the developer was very quick to respond.

Deff still buggy but i expected that. Also enjoyed the 2hrs I put in. Still eager to see where this goes.

""Well months later I figured I would try it out again. It is more unplayable now than it was 5 months ago. I cant even start a game. Nor does deleting everything and starting over help. Cant equip anyone or myself, it just creates duplicate items. Cant interact with AI at all. This all happens after visiting first large town to the right. Armies just run around with arms behind them like a moronic naruto.

How has this game gone backwards in 5 months...how."" . worth a buy best fps trainer i have used so far, also fun which is different as it challenges you, easy at first but gets harder the more you progress , if you want to improve on pubg csgo rainbow ect this will help you improve on your weaknesses in any fps shooter.

EDIT: 1 one thing that is needed is a lean mechanic like pubg or r6.. Firstly, this escape room is extremely buggy, you cant interact with 90% of items around you, controls are just terrible, things are getting stuck and if you drop them on floor you cant pick them up anymore, graphics are ehm not even funny. Puzzles are super boring.
I dont know what else should I write in this quick review... if it would be for free, I would say dont waste your time anyway. For 0.79\u00a3? hell no
(refunded). Well.. what can i say about this amazing game???

First off, i hesitated with this game simply because i felt i had too many similar ones in my library - well yes and no.

This is not Gnomoria/Towns/Lantern Forge/Dwarf Corp etc ... Well, ok.. in many respects it is lol - you can build/dig/gather/forage/kill stuff etc so in that sense it is very similar to the above games...

But, as far as in some respects it is a lot more simpler but also a lot more interesting...

I have only played a few levels of the campaign so far and have not yet tried sandbox mode (as of date of review)

And it is an amazing campaign - it actually has a tutorial (which more or less holds you're hand the entire way) but as the *levels* progress, you are able to build more and more *free form* (which is what i love in games like this (build what/how/where and when)

Graphically its nothing to write home about - but even that it does well, i would personally say i like these graphics compared to most of the games i list above (easier on the eyes, easier to see what is going on etc)

I actually **Care** about this game (the others, although i do like them and play every once in a while - they don't really give me a sense of... *worth*??? as this game does) - i think this is due to the *background story*

Yes, it is still in early access after 5 years (away from steam) for which reasons i could not even begin to understand (not a negative - for me)

I would be interested to see what further things Nick has planned for this game.

- suggestions for you Nick -

Please can we have a mode where we can choose our own size map? (don't know if this is on sandbox to be fair as i haven't tried it yet)

*wel thats about it for suggestions at the moment - can't really say much else at this time while only being on level 3 of the campaign)

Amazing concept, amazing game

but the only reason i give it an 8/10 is because the confusing *game crash on launch* error

this is fixed by forcing game compatibility mode to windows 8 and full screen optimization to off

Best \u00a315 i have spent to date i would say!

UPDATE

Yes sandbox does have a map size choice (as well as a whole host of other things - how many caverns and of what dimensions\terrain changes (mountains\valleys\plateaus etc) how often *invasions* occur and how many in each, difficulty... Even how many dwarves and stocks you start with!!!

And the biggest selling point for me? **choose your start location where the camera is focused!!!**

I dont think i need to update this review further (unless for some reason it becomes a negative - but i don't see that happening!)

Epic game Nick... Please keep adding to it! (i know you have almost done all you can minus tweaks\bug fixes... BUT here is a big suggestion for you (maybe you won't because the code is already implemented - and that is fair enough (just thought i would try :P) one would be female dwarves (have kids to expand the population) or better yet... have them spawn from some kind of *rock cocoon* (as in legends of old)

That's about all i can say here to be honest (watch out for a series coming soon at *Graham lee* on Youtube). nice arkanoid/breakout clone for satanic pro gamers. waste my time to playing this game ,other ppl can steal our base ,then can build the item in our base ,rubbish waste money to buy this
